Flexible

Passionate

Confident

Raul Escobedo

Software Developer

I am a software developer with robust problem-solving skills. I have a keen eye for creating and designing websites and applications. Because of my education background, I pay very close attention to detail, can multitask, and clearly communicate with my team members and clients.

PERSONAL PROJECTS

The Trainer (01/2022 - Present)

- This is my portfolio project I have been working on with NuCamp. This website and application is intended to connect personal trainers and their clients during and post workouts. The trainers will be able to create custom exercises and workouts. The project was initially created with HTML, CSS, Bootstrap, and jQuery. It has evolved to a React website and soon to be a React Native application.

OKB Hope Foundation (01/2022 - Present)

- OKB Hope Foundation is a non-profit organization, which provides healthcare resources in Ghana. This website provides resources for those in need and to give others the opportunity to donate and volunteer at OKB Hope Foundation. I have been collaborating with 2 other developers on a daily basis on the different components, features, and pages we will be implementing on this website.

Portfolio (01/2022 - Present)

- My portfolio is used to showcase my work, education, skills, and a way to get to know me. Like all of my websites, I have a 'mobile first' approach. I feel it is important for the client or customer to have a positive experience with my inclusion of a few 'WOW' factors and an easy navigation of the page. HTML, CSS, and Bootstrap were primarily used to create the layout of this website.

WORK EXPERIENCE

Freelance Web Developer

OKB Hope Foundation

01/2022 - Present

Remote

OKB Hope Foundation is a non-profit organization, which provides healthcare resources in Ghana.
